

# **CORONAVIRUS**

## **AN AT RISK PERSON LIVES HERE**

**Some people have weaker immune systems** (older folks, those receiving chemotherapy), and therefore are **more likely** to catch coronavirus (COVID-19), and are more likely to suffer **life-threatening complications** if they become ill with it.

Because of this, we are self-isolating and / or practicing social distancing as a preventative measure.

**IS YOUR VISIT ESSENTIAL?**
